

MCC BREAKFAST MEETING

This event is co-sponsored by the Minnesota Chapter of the International Concrete Repair Institute.

Thursday, September 21, 2017
7:30 - 9:00 am

Midland Hills Country Club
2001 Fulham Street
St. Paul, MN 55113

A full, hot breakfast buffet will be served. Join us for great information, an opportunity to network and continuing education credits.

There is a \$25 co-pay to attend. \$20 early-bird registration ends September 15, 2017.

Register online at
www.mnconcretecouncil.com

Attendees will be awarded a certificate of attendance for one PDH. This presentation has been approved for one AIA LU.

The Minnesota Concrete Council (MCC) is dedicated to advancing education, technical practice, scientific investigation and research into cast-in-place concrete construction by organizing the efforts of its member for a non-profit public service. Membership represents design, construction and support industries associated with reinforced and post-tensioned concrete construction.

REPAIRS & REHABILITATION OF POST TENSIONED STRUCTURES

Scott Greenhaus

*Executive Vice President and Chief Risk Officer
Structural Group, Inc.*

Because of the technical and safety precautions required in repairing highly-stressed post tension tendons, knowledge of proper repair techniques is critical to maintaining the integrity and safety of the structure, and those

around it. STRUCTURAL's approach to repairing post-tensioning tendons in buildings, water containment structures, bridges, and dams recognizes these needs and includes a holistic view of the structure's behavior—combined with understanding the root cause of the post-tensioning challenge.

STRUCTURAL, a Structural Group company, integrates technology-driven solutions into its industry-leading specialty contracting services. STRUCTURAL's specialty contracting services improve, protect, and repair infrastructure and are provided directly to owners or through general contractors and designers.
